

Switching Power Supply BTL-5A Instruction Manual

BTL-5A switching power supply is designed for ASG BTL-05, BTL-10, and BTL-15 electric screwdrivers. The power supply is characterized by stable performance, strong power, extreme safety and easy maintenance.

Instructions

- BTL-5A switching power supply is applied to ASG BTL-05, BTL-10, and BTL-15 electric screwdrivers only
- Please notice whether the electric screwdriver connects to the power supply with 5P connecting wire in correct orientation
- Insures that the power supply is connected at 90-240V 50/60Hz, and turn on the power. When the LED red light illuminates, the machine is ready to work
- User can change the output voltage to LOW: 25V or HI: 30V by turning the HI/LOW switch, to convert the speed of the electric screwdriver

Features

| Features | |
|-------------------------|--|
| Model | BTL-5A |
| ASG Number | 65710 |
| Input Voltage AC | AC 90-240V 50/60 Hz |
| Output Voltage DC | DC 25V/30V/9V — LOW/HI 2 Level to Switch |
| Output Amp | DC 5.0A — (MAX) |
| Size WxDxH | 3.41 in. x 6.61 in. x 2.19 in |
| Weight | 1.46 lb. |
| Cord Length | 5.9 ft. (with ground wire) |
| Compatible Screwdrivers | ASG BTL-05, BTL-10, BTL-15 |

Caution

- The product is designed for indoor use only. Do not use product in an outdoor or humid environment, or near combustible gas, liquid or powder to avoid danger
- The plug must match up with the socket. Please do not modify the plug in any form. Any kind of adapter for the power source with ground wire is forbidden
- Non-professionals should not disassemble the product to avoid accidents
